Aciclovir has also been investigated for the treatment of herpes labialis applied using an iontophoretic device. Currently approved drugs for the treatment of herpes labialis (cold sores) exhibit low levels of efficacy due to the limited ability of the drugs to penetrate the skin to the site where the herpes virus is replicating. Iontophoresis uses electric current to enhance the delivery of drugs through the skin. A guanosine analog antiviral drug that acts as an antimetabolite. It is primarily used for the treatment of herpes simplex virus infections, chickenpox, and shingles. It is on the World Health Organization’s List of Essential Medicines, the safest and most effective medicines needed in a health system.

SynZeal Research offers all Aciclovir related impurities which certified COA with all characterization data like IR, Mass, HPLC purity, NMR & TGA report. We also provide CMR, DEPT and detailed structure characterization report as per requirements. Abiraterone related products are being used by major pharmaceutical companies across the globe for their ANDA/DMF filing.
