Atomoxetine is the first non-stimulant drug approved for the treatment of attention-deficit hyperactivity disorder (ADHD). It is sold in the form of the hydrochloride salt of atomoxetine. This chemical is manufactured and marketed under the brand name Strattera; by Eli Lilly and Company and as a generic Attentin by Torrent Pharmaceuticals. There is currently no generic available within the United States due to patent restrictions.

SynZeal Research offers all Atomoxetine related impurities which certified COA with all characterization data like IR, Mass, HPLC purity, NMR & TGA report. We also provide CMR, DEPT and detailed structure characterization report as per requirements. Atomoxetine related products are being used by major pharmaceutical companies across the globe for their ANDA/DMF filing.
