Bupropion was first made by Nariman Mehta and patented by Burroughs Wellcome in 1974. It was first approved for medical use in the United States in 1985. It was originally called by the generic name amfebutamone, before being renamed in 2000. A unicyclic, aminoketone antidepressant. The mechanism of its therapeutic actions is not well understood, but it does appear to block dopamine uptake. The hydrochloride is available as an aid to smoking cessation treatment.

SynZeal Research offers all Bupropion related impurities which certified COA with all characterization data like IR, Mass, HPLC purity, NMR & TGA report. We also provide CMR, DEPT and detailed structure characterization report as per requirements. Bupropion related products are being used by major pharmaceutical companies across the globe for their ANDA/DMF filing.
