Chlorphenamine

A histamine H1 antagonist used in allergic reactions, hay fever, rhinitis, urticaria, and asthma. It has also been used in veterinary applications. One of the most widely used of the classical antihistaminics, it generally causes less drowsiness and sedation than promethazine.

SynZeal Research offers all Chlorphenamine related impurities which certified COA with all characterization data like IR, Mass, HPLC purity, NMR & TGA report. We also provide CMR, DEPT and detailed structure characterization report as per requirements. Chlorphenamine related products are being used by major pharmaceutical companies across the globe for their ANDA/DMF filing.

For more information on our products custom synthesis, contact SynZeal today.
