Dabigatran, sold under the brand name Pradaxa among others, is an anticoagulant medication which can be taken by mouth. It is used as an alternative to warfarin, since it does not have to be monitored by blood tests, but offers similar results in terms of efficacy for a number of conditions such as stroke prevention in atrial fibrillation and the prevention and treatment of venous thromboembolism. It is a direct thrombin inhibitor, and functions by directly inhibiting both free and fibrin-bound thrombin.

SynZeal Research offers all Dabigatran related impurities which certified COA with all characterization data like IR, Mass, HPLC purity,NMR & TGA report. We also provide CMR, DEPT and detailed structure characterization report as per requirements.

Dabigatran related products are being used by major pharmaceutical companies across the globe for their ANDA/DMF filing.
