Desloratadine is a selective, peripheral H1-antagonist. It is the active metabolite of loratadine. Desloratadine has a long-lasting effect and does not cause drowsiness because it does not readily enter the central nervous system.

SynZeal Research offers all Desloratadine related impurities which certified COA with all characterization data like IR, Mass, HPLC purity, NMR & TGA report. We also provide CMR, DEPT and detailed structure characterization report as per requirements.

Desloratadine related products are being used by major pharmaceutical companies across the globe for their ANDA/DMF filing.
