Diclofenac was patented in 1965 by Ciba-Geigy and came into medical use in the United States in 1988. Diclofenac, sold under the trade names Voltaren among others, is a nonsteroidal anti-inflammatory drug (NSAID) used to treat pain and inflammatory diseases such as gout. It is taken by mouth or applied to the skin. Improvements in pain typically occur within half an hour and last for as much as eight hours. It is also available in combination with misoprostol in an effort to decrease stomach problems.

SynZeal Research offers all Diclofenac related impurities which certified COA with all characterization data like IR, Mass, HPLC purity, NMR & TGA report. We also provide CMR, DEPT and detailed structure characterization report as per requirements.

Diclofenac related products are being used by major pharmaceutical companies across the globe for their ANDA/DMF filing.
