Proton pump inhibitors, also known as PPIs, are the most efficacious drugs for the initial treatment and for maintenance therapy of gastroesophageal reflux disease (GERD). Pantoprazole is a first-generation PPI that was initially approved by the FDA in 2000. It is also used to manage other disorders in which the decrease of gastric acid secretion is needed. This drug has been used over 100 countries worldwide. Pantoprazole is administered in several forms: a delayed-release oral capsule, oral suspension, as well as intravenous injection.

SynZeal Research offers all Pantoprazole related impurities which certified COA with all characterization data like IR, Mass, HPLC purity, NMR & TGA report. We also provide CMR, DEPT and detailed structure characterization report as per requirements. Pantoprazole related products are being used by major pharmaceutical companies across the globe for their ANDA/DMF filing.

For more information on our products custom synthesis, contact SynZeal today.
