Teriflunomide is the active metabolite of leflunomide, and it acts as an immunomodulatory agent by inhibiting pyrimidine synthesis. It is marketed under the name Aubagio® and is indicated for the treatment of multiple sclerosis, specifically relapsing forms. The FDA label states an important warning about the risk of hepatotoxicity and teratogenicity for patients using teriflunomide.

SynZeal Research offers all Teriflunomide related impurities which certified COA with all characterization data like IR, Mass, HPLC purity, NMR & TGA report. We also provide CMR, DEPT and detailed structure characterization report as per requirement. Related products are being used by major pharmaceutical companies across the globe for their ANDA/DMF filing.
