## About SynZeal

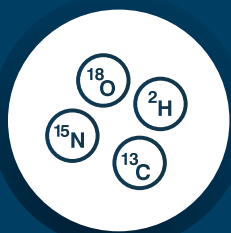

SynZeal is an ISO 17025:2017 & ISO 17034:2016 accredited research driven company specializes in the development of pharmacopeial and non-pharmacopeial reference standards. SynZeal provides full technical support for the synthesis and analytical projects. Our expertise lies in the custom synthesis of complex organic molecules—a core focus that shapes everything we do. Driven by an unwavering commitment to quality, we deliver products meeting stringent regulatory requirements. SynZeal is a trusted research partner for drug development, analytical validation, and quality-controlled applications.

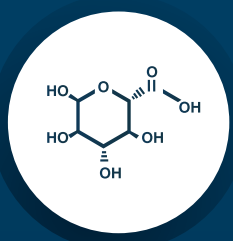

# Our Products

Certified Pharmaceutical  
Reference Standards

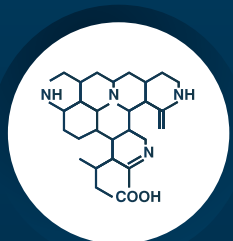

Stable Isotope  
Labelled Compounds

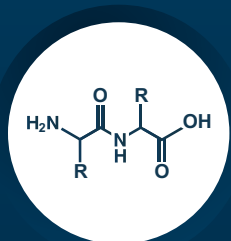

Drug  
Glucuronides

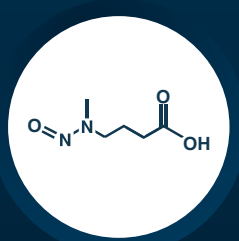

Early Stage API for  
R&D Supply

Focused Compounds  
Library Synthesis

Custom Peptide  
Synthesis

Nitrosamine  
Products

## Our Services

**Analytical Method Development  
and Validation**

**LC-MS Analysis and Method  
Development for Impurity Profile**

**Unknown Impurity Isolation and  
Characterization**

**Mass Directed Purification by Flash  
Chromatography and Preparative HPLC**

**Medicinal Chemistry Support**

**Early Stage API Technology  
Development for R&D Supply**

**Contract Development and  
Mfg. Services (API & Intermediates)**

**Technical Report about Non-formation  
of Nitrosamine in Drug Substance**

# Analytical Chemistry

SynZeal is well equipped with a wide range of fully qualified, analytical instruments. All data is peer reviewed and undergoes a technical QC review and quality assurance prior to release. SynZeal certificate of analysis includes all required characterization and purity data. SynZeal follows Quality Management System complying ISO 9001 : 2015, ISO 17025:2017 & ISO 17034:2016.

The Customized reports with any of the following analysis also available

**1H NMR | 13C NMR | HPLC Purity | Chiral Purity | LC-MS | Loss on Drying**  
**Traceability to the Primary Reference Standard | Halide content by Ion Chromatography**  
**Elemental Analysis (C, H, N) | Specific Optical Rotation (SOR) | Thermogravimetric Analysis**

We support customers to understand chemistry aspect of regulatory queries and solve them in most efficient manner to meet their project deadline.

## Synthetic Chemistry

SynZeal operates a state-of-the-art synthesis laboratory at Ahmedabad, Gujarat, India for custom synthesis of research chemicals, high purity pharmaceutical references standards, metabolites, nitrosamines and rare discovery scaffold. SynZeal Research Centre is meticulously designed and has 168 fumehoods & 5 analytical laboratories with dedicated lab for preparative purification. SynZeal team is highly qualified and professionally competent scientists with proven track record to deliver challenging chemistry projects.

Asymmetric Synthesis

Steroid Chemistry

Peptide Chemistry

Carbohydrate Chemistry

Nucleoside Chemistry
