About SynZeal

Synzeal is a research-driven company that provides full technical support in synthetic, analytical and medicinal chemistry. We are committed to delivery of high quality research products and services provided to pharmaceutical companies at various stages of product development, meeting the needs confidentially, with excellent cost-benefit and effective compliance with the stipulated service deadlines. We have ISO 9001:2008 & ISO 17025 certifications for quality systems management.

Medicinal Chemistry Support

Analytical Chemistry

SynZeal is well equipped with a wide range of state-of-art fully qualified analytical instruments. All data is peer reviewed and undergoes thorough technical QC review and quality assurance prior to release. SynZeal certificate of analysis includes all characterization and purity data for required regulatory compliance.

The Customized reports with any of the following analysis also available

2D NMR | COSY | NOSEY | HETCOR | Traceability to the Primary Reference Standard | Halide content by Ion Chromatography | Capillary Electrophoresis analysis Elemental Analysis (C,H,N,) | Specific Optical Rotation (SOR)

We support our customers to understand chemistry aspect of regulatory queries and resolve them in most efficient manner to meet their project timeline.

Synthetic Chemistry

SynZeal operates a state-of-the-art synthesis laboratory at Ahmedabad, Gujarat, India for custom synthesis of research chemicals, high purity pharmaceutical references standards, metabolites and rare discovery scaffold. Currently synthetic labs are operational with 60 fume hoods & 216 will be operational by next year. SynZeal strength is highly qualified and professionally competent scientists with proven track record to deliver challenging chemistry projects.
